

Italian Society for Chaos and Complexity

www.sicc-it.org

The Italian Society for Chaos and Complexity (SICC) is proud to introduce the:

SICC Talks on Complexity

a series of online lectures on hot topics on complexity at large. Each seminar will be given by two prominent scholars and followed by a short debate and Q&A session. Upon (free) registration, participants will receive instructions on how to connect to attend the lecture.

Each year, the Italian Society for Chaos and Complexity organizes the SICC International Tutorial Workshop TOPICS IN NONLINEAR DYNAMICS, an event where PhD students, young researchers and leading speakers coming from diverse disciplines meet each other to spend a week talking about science, engineering and complexity. As this year we cannot meet in presence, the 15th edition of the yearly SICC workshop will take the form of a series of online lectures with the following calendar.

H. Osinga, Shaken but not stirred: using mathematics in earthquakes
I. Sushko, Non-smooth dynamical systems: Explaining the emergence of fashion cycles

9 AM CET

J. C. Sprott, Ergodicity in Chaotic Oscillators
A. Shilnikov, Homoclinic chaos

4 PM CET

N. Leonard, To be announced
I. Couzin, To be announced

4 PM CET

T. Eliassi-Rad, To be announced
R. D'Souza, To be announced

6 PM CET

To register, please visit <http://www.sicc-it.org/CompTalks>.
Participants are offered a special discounted rate to become SICC member: 25€ for full four-years membership (rather than 50€)
